

Turboen puller

1

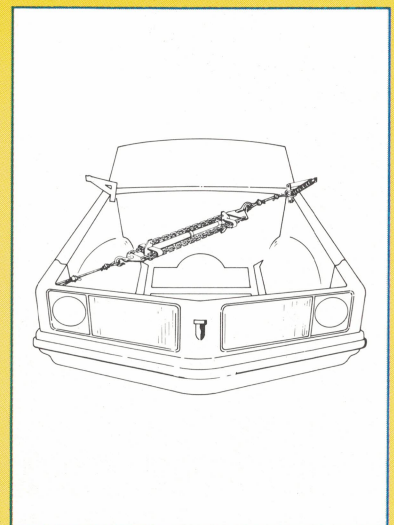

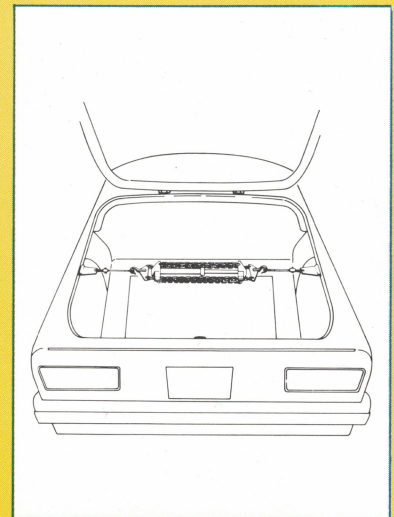

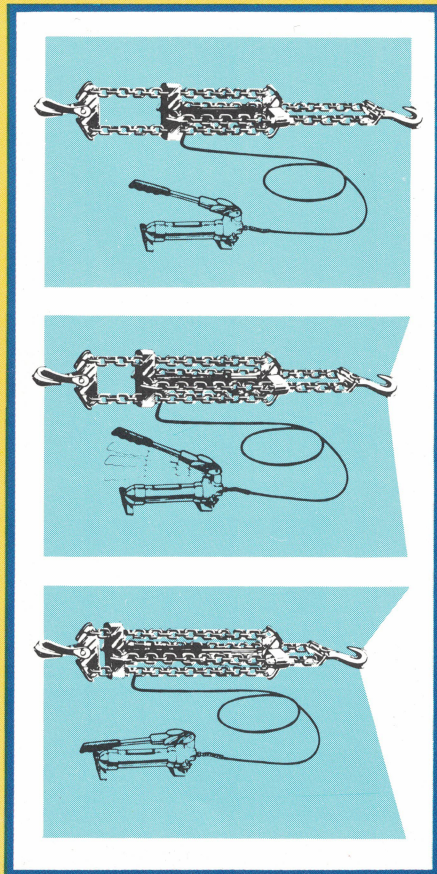

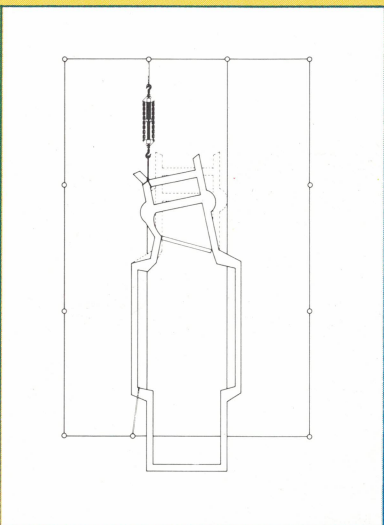

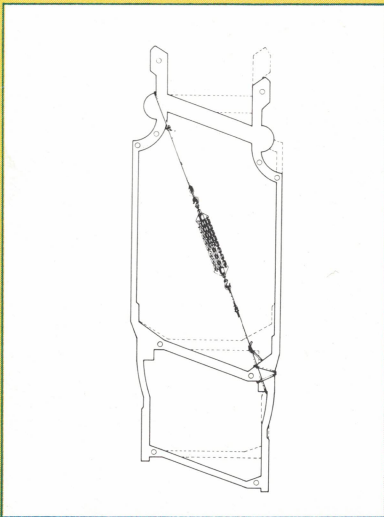

To prepare the Turben Puller for use is as simple as 1-2-3! First, insert the top end of your hydraulic ram in the Turben Puller.

2

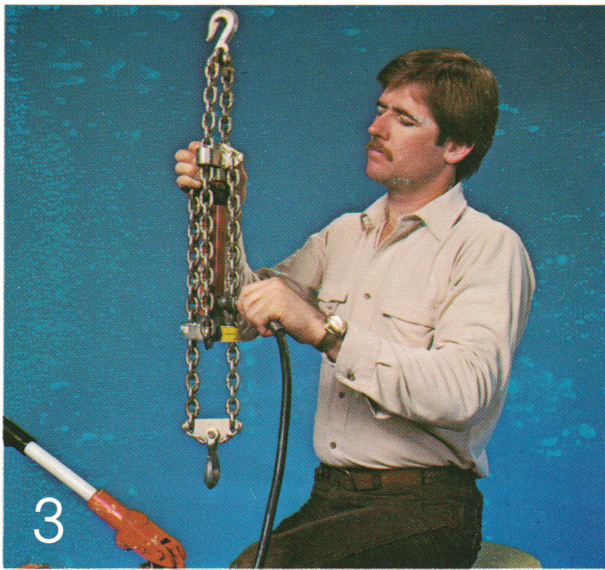

Next, insert the bottom end into the Turben Puller collar. It's both simple and quick.

The Turben Puller Has Endless Applications

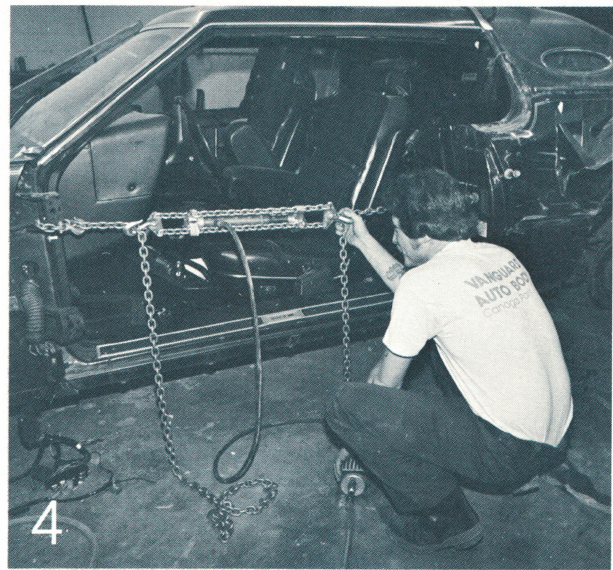

It Can Be Used With Any Standard Hydraulic Ram

Gives you immediate pull Where you want it. When you need it.

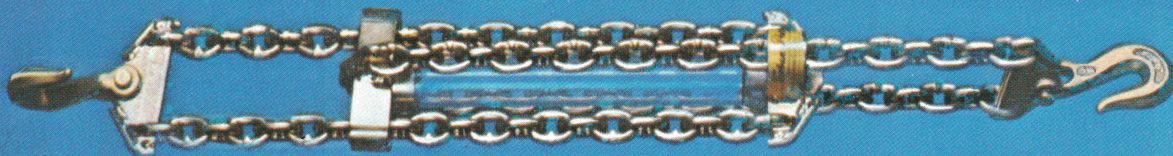

3

Activate your hydraulic pump.

4

You're now ready to go with a fully controlled pull.

Ten Important Reasons Why YOU Should Own A TURBEN PULLER

- 1 It costs much less... YOU CAN AFFORD IT. Most units cost under \$100⁰⁰.
- 2 The return on your investment is almost immediate. The time saved on your first job computed into dollars could be equivalent to the purchase price of several Turben Pullers. Think about it!!!
- 3 Extremely light weight - easy to handle. The 4-ton unit weighs less than 8 pounds.
- 4 Does not take up valuable garage space. Hang it on the wall with the rest of your hand tools.
- 5 Designed to work extremely well in tight/limited spaces. Ideal for engine compartment work/ between frame horns - whatever.
- 6 Absolutely the best product for pulling/correct-
- 7 ing diamond frame problems. Eliminates large, cumbersome rigging chores.
- 7 Saves time and effort right from the start. The Turben Puller can be rigged in a fraction of the time. Time saved equals \$\$ in your pocket.
- 8 Absolutely no power efficiency loss. A 4-ton Turben Puller will pull the full four tons of the hydraulic ram.
- 9 A valuable tool for pulling cross members back into place. This is but one of the many Turben Puller uses.
- 10 The larger model has a pull capacity of up to 40,000 pounds. That's 20 tons! Probably much more pull than you'll ever need.

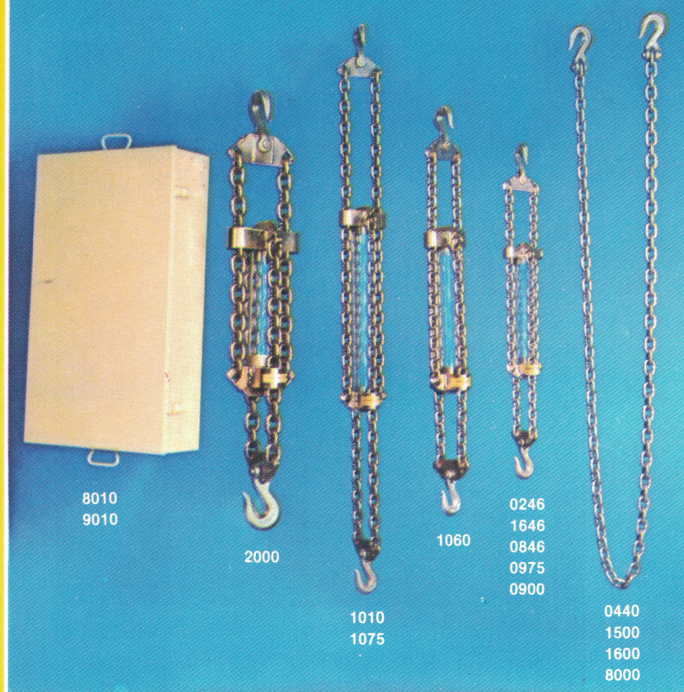

The Body Guard System
